

INTERNATIONAL SOLUTIONS

JTS is your supply chain partner from beginning to end.

JTS, a licensed ocean freight forwarder and NVOCC, leverages superior import/export ocean experience with a large network of partners from around the world to provide the most reliable and efficient logistics services available in the market.

When you partner with JTS International, you have an array of transportation options to choose from, making it easier to manage the movement of your imported/exported cargo around the world.

Our competitive pricing is coupled with reliable, friendly, hands-on customer service. We pride ourselves on quick responsiveness to all our clients' questions as we understand the need for accurate and timely information. Our staff will keep you informed throughout the entire process.

Ocean Freight – JTS offers worldwide ocean import and export services, with both full container load (FCL) and less-than-container load (LCL) shipments. JTS also offers global hazmat and temperature-controlled services. Our pricing is competitive, and you can track shipments online via JTS' cloud-based *arriviture*® TMS.

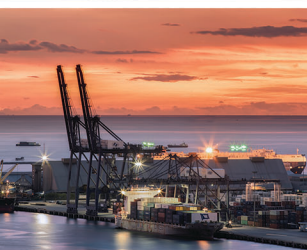

Although we have automated capability, your account will be taken care of by our experienced team, which is available for any questions you have. Unlike many of our competitors, we strive to give you that "human" touch, so you have the comfort of knowing our team is partnering with you for all your ocean logistics needs.

Air Freight – JTS supplies you with worldwide service to meet your import/export air freight requirements. Our pricing is competitive, you can track shipments in our cloud-based TMS, *arriviture*®, and you'll experience excellent service for your time-sensitive shipments.

Drayage – The movement of freight between warehouses, distribution centers and container yards is facilitated by our network of carriers operating in and out of all major U.S. ports and rail ramps. We offer live load/unload services along with drop and pick options in certain locations. JTS International is experienced in the handling of overweight and hazmat cargo, and we have triaxle services available. We also offer transloading and cross-docking services so that our clients who have multimodal needs work with one provider from the beginning of their transport move to the very end.

Customs Clearance Handling — JTS offers our clients customs brokerage services for any product being imported into the U.S. Our team is especially knowledgeable in importing food products, which are subject to FDA review processes.

The key to our partnership is constant communication throughout this process so that our clients can have an accurate handle on when to expect release of their product.

INTERNATIONAL SOLUTIONS

Insurance Handling – JTS offers competitive and comprehensive door-to-door coverage for your air and ocean freight shipments.
