## **JTS Launches FreightOptixx™ TMS for Customers**

**Fresno, CA – September 15, 2016** – JTS (Johanson Transportation Service), a leading third-party supply chain solutions provider, announces the brand launch of **FreightOptixx™**, their cloud-based TMS (Transportation Management System). The cutting-edge system is available as a value-added service and on a per transaction fee schedule to select customers and enables them to leverage JTS technology innovations that integrate with their own enterprise systems without the need for investing in a Transportation Management System of their own.

FreightOptixx™ gives users access to every detail in their supply chain data, all in one online location, with complete visibility to all their freight communications from start to finish. JTS customers can increase their service levels to their own customers, and it saves them time on manual logistics tasks.

For users shipping via Full Truckload, Less-than-Truckload, Rail Intermodal and International freight, FreightOptixx™ empowers users to easily track their shipments, request instant spot rate quotes from multiple carriers displayed on one screen for comparison, create and change freight orders, create and view all shipping documents, consolidate their shipments using the lowest cost optimizer tool, send pick-up instructions to the carrier electronically, view invoices and accounts payable status and run reports for on-time delivery, freight cost reconciliation, exceptions, freight class and much more.

*“FreightOptixx™ illustrates our commitment to providing the highest level of service and most innovative technology possible to our shipper and carrier customers. The technology makes their logistics operations more efficient by enabling total data visibility immediately from their desktop or mobile devices so they can quickly get information when and where they need it,”* says President/CEO Larry Johannson.

According to Dave Hiersche, VP of Technology, *“Our team will continue to provide the solutions our customers need to achieve the visibility and operational and cost controls that will create effective supply chains.”*

Customers can sign up for FreightOptixx™ at [www.johansontrans.com](http://www.johansontrans.com)
